

# SITA

Available from January 2019

## SITA *CleanoSpector*

Contact-free cleanliness inspection of part surfaces  
New Features – Updated Design

- ✓ **Faster measurement**
- ✓ **Updated design**
- ✓ **Shortcut key to device check with standards**
- ✓ **Adjustable brightness of target pointer**
- ✓ **Automatic re-start of target pointer after measurement**
- ✓ **Mute mode**
- ✓ **Extensive accessories**

# SITA *CleanoSpector*

## Accessories

### Contact-free measurement

#### Fine adjustment knob

Convenient fine adjustment of measurement distance for contact-free measurement with stand ( e.g. on small parts or in tiny grooves)

### Measurement with spacers

#### Additional spacers for easy measurement at various part geometries

e.g. wires, pipes, grooves

#### Different spacer materials

Stainless steel: robust and easy to clean

Plastic: for sensitive parts

### Handling of parts

#### V-block

Convenient and solid fixing of rotation-symmetric components

### Checking

#### Calibration standards

Set of calibration standards for calibration of the device directly on-site

### Cleaning

#### Cleaning Kit

Complete equipment for cleaning of the sensor optics
